Art Unit: 1714

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 33 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 33 defines G" as viscous modulus at line 3 but refers to it as elastic modulus at line 8.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 33, 34 and 45-48 are rejected under 35 U.S.C. 102(b) as being anticipated by Corzani et al.

Corzani et al disclose adhesive compositions suitable for application to absorbent articles attached to human skin. These adhesives are taught as possessing modulus ratios such as claimed in the instant claims. Other physical properties recited instantly are seen as inherent to the adhesives of the reference since the chemical properties are satisfied.

Claims 35-44 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
